NEPALESE CHILD CARERS CROWDFUNDING CAMPAIGN

 **carers**
worldwide

The Carers Worldwide school holiday appeal will help child carers return to school and have the vital support that they need in their caring roles, giving them the childhood and future they deserve. As there are no state provisions, community support or safety net for them, your donation is vital and will provide necessary funding to conduct home visits, give practical support and end their isolation.

WHY HELP?

Child carers in Nepal are confined to the house, helping to dress, feed and bathe their parents, grandparents and siblings. They take care of household tasks, including cooking, cleaning and child care. In many cases, nobody outside of their family is aware of their situation. They are effectively invisible to the authorities and society, their life opportunities are diminished to almost nothing - many have lost hope, living a lost childhood.

HOW CAN YOU HELP?

Your donation will provide vital funding to conduct home visits, offer practical support and someone to talk to. It will help us provide home tutoring, books and school supplies and needed respite from their caring responsibilities. It will also help establish child carer groups, bringing child carers together and provide counselling to help them overcome physical and mental health issues.
